

Alan Mori-Abrams

Porter Ranch, CA • (310) 755-8136 • alan.mori.abrams@gmail.com • [linkedin.com/in/alan-mori-abrams-552b79216](https://www.linkedin.com/in/alan-mori-abrams-552b79216)

Education

California State University, Northridge B.S. in Computer Science, Minor in Mathematics | GPA: 3.3 | Expected Graduation May 2027

On-Campus Involvement: Layer 8 Cybersecurity Club: completed OverTheWire wargame challenges and attended workshops, building hands-on skills in Linux, networking, and foundational cybersecurity concepts

Relevant Coursework

Computer Organization • Networks and Security • Computer Architecture
Operating Systems • Computer Networks Software (upcoming)

Projects

Active Directory & IT Support Homelab

Personal Project — VMware Workstation

- Built a fully functional Active Directory environment from scratch by deploying Windows Server 2019 and domain-joining a Windows 10 VM on VMware Workstation, replicating enterprise IT infrastructure end-to-end
- Secured and organized 10+ user accounts across multiple Organizational Units (OUs) in ADUC by enforcing least-privilege access controls, replicating real-world identity management practices
- Strengthened endpoint security across domain-joined machines by creating and applying Group Policy Objects (GPOs) to enforce password policies and desktop restrictions, simulating production-grade configurations
- Resolved simulated hardware, software, and network issues across multiple VMs using structured, tier 1 helpdesk-style troubleshooting methodology

Automod Simulation Prototype

CSUN Research Assistant Onboarding

- Self-taught Automod from technical documentation and a reference manual with no formal instruction, then applied it to build a multi-vehicle logistics simulation from scratch
- Modeled vehicles and cargo moving simultaneously across multiple paths, then iterated on routing logic to maximize efficiency while preventing collisions between units

Technical Skills

Hardware & Support: Hardware troubleshooting, device configuration, mobile device setup, FRU Replacements

Operating Systems: macOS, iOS, Windows 10/11, Windows Server 2019, Linux (Ubuntu, Kali Linux)

Tools & Platforms: VMware Workstation, Active Directory, Group Policy (GPO), ADUC, VS Code, Git, Remote support, Automod, Remote Desktop Protocol (RDP, In progress)

Languages: Java, Python, C, GDScript

Certifications: CompTIA A+ (In Progress)

Other: System backups, user account management, software installation & updates, ticketing workflows

Work Experience

Security Supervisor — Contemporary Services Corporation (CSC)

June 2024 – Present

- Achieved 100% post coverage and zero safety incidents while leading teams of 15+ security personnel at large-scale events through proactive protocol enforcement and real-time decision-making
- Resolved escalating situations with minimal disruption to event operations as primary on-site incident commander, coordinating live communications between personnel and stakeholders
- Kept operations running smoothly under pressure by optimizing real-time staff deployment and communication across multiple posts at high-profile events — skills directly applicable to supporting live presentations, special events, and time-sensitive technology needs

Camp Counselor — Encino Community Center

June 2024 – Present

- Delivered structured daily programming and maintained safety standards for groups of 25 participants across multi-week sessions
- Ensured operational continuity and regulatory compliance by maintaining opening/closing procedures and accurate attendance and incident records for 25+ participants
